

Ritesh Bishnoi

Software Engineer

Email: riteshbishnoi4@gmail.com | Mobile: +91 7568551529

Summary

- Overall 4+ years of software development experience, including around 3.5 years specializing in Flutter for cross-platform mobile applications, with additional experience in Node.js for backend integration.
- Hands-on experience in applying software design patterns such as MVVM, Repository, Singleton, Factory, and Observer to build scalable and maintainable Flutter applications.
- Proficient in using state management solutions such as Stacked, Bloc, Provider, and GetX to ensure efficient state handling and clean architecture in Flutter applications.
- Expertise in the Stacked framework, leveraging state management, dependency injection, and reactive MVVM architecture to deliver scalable, maintainable, and testable Flutter applications.
- Experienced in implementing local storage using Shared Preferences (key-value storage) and Hive (NoSQL database) to ensure efficient, secure, and high-performance data management in Flutter applications.
- Proficient in integrating and managing RESTful APIs using packages like http and Dio, with expertise in network communication, data parsing, error handling, and secure data exchange.
- Experienced in leveraging Firebase services such as Authentication, Firestore, Cloud Messaging, and Storage to build real-time, secure, and scalable Flutter applications.
- Experienced in publishing and maintaining Flutter applications on Google Play Store and Apple App Store, ensuring smooth deployment, versioning, and compliance with platform guidelines.
- Skilled in creating responsive, visually appealing, and animated user interfaces aligned with design best practices, while collaborating effectively in Agile teams.

Professional Experience

Geminate Solutions Pvt. Ltd.

Flutter Developer (Contract · Remote) | June 2025 – MAY 2026

PiZone Infotech Pvt. Ltd.

Software Engineer | Feb 2022 - June 2025

Technical Skills

Languages & Technologies: Dart, C, JavaScript, XML, HTML, CSS

Frameworks & Libraries: Flutter (Stacked, Bloc, Provider, GetX, Dio, Parse Server SDK, Hive, Plugin Development), Node.js (NestJS, ExpressJS)

Backend & Cloud Services: Firebase, MongoDB, Supabase

Tools & Platforms: VS Code, Android Studio, Git, Postman, JIRA, Trello, Figma

Operating Systems: Windows 7/10/11, macOS

Domain Expertise: Mobile Application Development

Project Summary

MIMIYA

Duration: Nov 2025 - May 2026 | Team Size: 1

Skills Used: Flutter, Firebase

Tools Used: Git

Summary: Mimiya is a role-based Flutter mobile app that helps moms and pregnant women track their health progress, complete guided tasks, and share updates in a social hub.

Responsibilities:

- Enhanced and maintained an existing Flutter application by implementing new features and refining existing modules.
- Utilized Firebase services (Firestore, Authentication, Cloud Storage, FCM) to build and enhance app functionalities.
- Implemented and optimized push notification workflows using Firebase Cloud Messaging (FCM).
- Used GetX to maintain and update app state across screens.

- Streamlined the application navigation flow to ensure smoother and intuitive user interactions.
- Performed bug fixing, code refactoring, and performance optimization to improve app stability.

Drago Live

Duration: June 2025 - Dec 2025 | Team Size: 3

Skills Used: Flutter, NodeJs, MongoDB

Tools Used: Git

Summary: Drago Live is an audio video live streaming app for global connections and realtime interactions.

Responsibilities:

- Enhanced Flutter-based live streaming application by fixing UI/UX issues and adding new features.
- Integrated RevenueCat API in Node.js backend to manage subscriptions and in-app purchases.
- Used GetX for state management across screens.
- Designed and implemented the post-stream reward claim system with real-time balance updates.
- Collaborated with backend team to ensure smooth deployment with minimal disruption.

OkayReport (Doctor, Assistant, Patient)

Duration: Oct 2023 - June 2025 | Team Size: 2

Skills Used: Flutter

Tools Used: Git, JIRA

Summary: OkayReport offers a user-friendly experience for doctors, assistants and patients ensuring smooth medical records management and appointment scheduling.

Responsibilities:

- Designed and implemented user interfaces using Flutter widgets.
- Integrated RESTful APIs to fetch and display data and handled async operations.
- Used Stacked framework for state management across screens.
- Gathered user feedback and updated app with new features and fixes.
- Optimized app performance by identifying and resolving bottlenecks.
- Collaborated with backend developers and product manager for delivery.

- Managed deployment processes to ensure smooth updates.

SimpleRuns

Duration: June 2023 - Oct 2023 | Team Size: 2

Skills Used: Flutter, NodeJS, ExpressJS, MongoDB

Tools Used: Git, JIRA

Summary: SimpleRuns provides delivery tracking and load sheet management services for freight operations.

Responsibilities:

- Handled enhancements as a Flutter and NodeJS developer.
- Added new features and optimized existing functionalities.
- Integrated RESTful APIs and ensured seamless data fetching.
- Added new endpoints and optimized database queries for better performance.
- Implemented JWT authentication middleware for secure access.
- Performed high level estimation and contributed to design decisions.

Qualifica

Duration: March 2023 - April 2024 | Team Size: 3

Skills Used: Flutter

Tools Used: Git, JIRA

Summary: Qualifica enhances task and appointment management for the Qualifica Group.

Responsibilities:

- Designed architecture using Stacked framework.
- Developed and refined responsive UI across devices.
- Managed state with ViewModels in Stacked.
- Configured navigation using Stacked navigation service.
- Guided and supported junior developer.
- Managed project timelines and ensured deliverables.
- Provided estimations and support for business requirements.

VISTA – Workplace Wellbeing

Duration: May 2022 - March 2023 | Team Size: 4

Skills Used: Flutter

Tools Used: Git, JIRA, Trello

Summary: Vista is an ecosystem promoting employee wellness through mental, physical and social programs. Responsibilities:

- Handled enhancements and implemented new features.
- Ensured features integrated smoothly with Bloc and Hive.
- Collaborated with developers and stakeholders to deliver solutions.

Education

MCA, Rajasthan University, Jaipur (2019) | BCA, MGS University, Bikaner (2016)
