PROFESSIONAL SUMMARY

Flutter Developer with 4+ years of software development experience, including 3.5+ years specializing in Flutter for building scalable, cross-platform Android and iOS applications, along with hands-on experience in Node.js, Express.js, and MongoDB for backend development. Proficient in Flutter, Dart, Clean Architecture, MVVM, Repository Pattern, SOLID Principles, and state management frameworks including Bloc, Provider, GetX, and Stacked. Experienced in integrating RESTful APIs, GraphQL, Firebase, local storage, and third-party services to deliver responsive, high-performance, production-ready applications. Skilled in performance optimization, secure API integration, and Google Play Store/App Store deployment, following Agile, CI/CD, and modern software engineering best practices.

TECHNICAL SKILLS

Languages: Dart, JavaScript, TypeScript, C, HTML, CSS, XML

Mobile Development: Flutter, Android, iOS, Cross-Platform Development, Responsive UI, Adaptive Layouts, Material Design, Custom Widgets, Animations, Platform Channels

State Management: Bloc, Provider, GetX, Stacked

Architecture & Design Patterns: Clean Architecture, MVVM, MVC, Repository Pattern, Dependency Injection, SOLID Principles, Object-Oriented Programming (OOP), Asynchronous Programming

Backend & APIs: Node.js, NestJS, Express.js, MongoDB, RESTful APIs, GraphQL, Dio, HTTP, JSON, JWT Authentication

Firebase & Cloud Services: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Push Notifications, Supabase, Parse Server

Local Storage: Hive, Shared Preferences, Offline Caching

Testing & Performance: Unit Testing, Widget Testing, Debugging, Performance Optimization

Third-Party Integrations: RevenueCat, Payment Gateway Integration, Third-Party Package Integration

Tools & Version Control: Git, GitHub, GitLab, Android Studio, Xcode, VS Code, Postman, JIRA, Trello, Figma

Development Practices & Deployment: Agile, Scrum, CI/CD, Code Reviews, Release Management, Google Play Store, Apple App Store Deployment

PROFESSIONAL EXPERIENCE

Flutter & Node.js Developer (Contract) — Geminete Solutions

June 2025 – June 2026

Remote

- Independently delivered new Flutter features and enhancements — live-streaming improvements, post-stream reward claims with real-time balance updates, and refined user workflows — coordinating directly with the project manager for requirements and guidance.
- Engineered backend enhancements using Node.js, integrating the RevenueCat API for subscription management and in-app purchases, and Firebase services (Authentication, Cloud Firestore, Cloud Storage, Cloud Messaging) for secure authentication, data management, and push notifications.
- Stabilized and refined the application by resolving production issues, refactoring legacy modules, enhancing navigation flows, and managing application state with GetX.
- Estimated, developed, and tested production-ready features end-to-end, ensuring smooth releases and long-term application stability.

Flutter Developer — PiZone Infotech

February 2022 – June 2025

Jaipur, India

- Delivered new features, enhancements, and bug fixes across 7 production Flutter applications, including authentication, AI-powered conversations, real-time messaging, subscriptions, payment integration, user profiles, and in-app coin systems.
- Designed and developed scalable cross-platform applications from the ground up using Flutter and Clean Architecture (Stacked, Bloc, Hive), implementing responsive UI, reusable components, and platform-specific optimizations for Android and iOS to improve maintainability, modularity, and offline data persistence.
- Implemented and optimized backend functionality using Node.js by integrating RESTful APIs, creating new endpoints, optimizing database queries, and implementing JWT-based authentication for secure access.
- Improved application performance, responsiveness, and overall user experience by optimizing asynchronous operations and refining existing features, ensuring seamless API integration and long-term code stability.
- Collaborated with product managers, UI/UX designers, backend developers, and QA engineers to estimate requirements, mentor junior developers, participate in code reviews, write unit and widget tests to maintain code quality, and support successful releases to the Google Play Store and Apple App Store.

KEY PROJECTS

Drago Live — Real-Time Audio/Video Live-Streaming App

Skills Used: Flutter, Dart, Node.js, Express.js, MongoDB, Parse Server

- Contributed to a cross-platform live-streaming app enabling real-time audio/video broadcasting, viewer interactions, and global social connections, backed by a Node.js, Express.js, and MongoDB backend.
- Rolled out RevenueCat-based subscription management and a post-stream reward claim system with real-time balance updates.

SimpleRuns — Freight & Delivery Tracking App

Skills Used: Flutter, Dart, Node.js, Express.js, MongoDB

- Developed a delivery tracking and load sheet management application for freight operations, integrating RESTful APIs and enforcing token-based access control to safeguard user data.
- Optimized database queries and backend endpoints to improve data reliability and performance; published on Google Play Store and Apple App Store.

VISTA — Workplace Wellbeing Platform

Skills Used: Flutter, Dart, Bloc, Clean Architecture, Hive

- Delivered a workplace wellness platform providing real-time, behavior-based insights to help remote teams improve engagement and mental, physical, and social wellbeing.
- Architected the app using Clean Architecture and Bloc for scalable state management, with Hive for efficient local data persistence.

LinkUp Idea — AI-Powered Social Collaboration App

Skills Used: Flutter, Dart, Stacked

- Created a cross-platform app connecting users worldwide based on shared ideas and goals, combining AI-powered conversations with real-time messaging for collaboration.
- Added subscription plans, an in-app coin system, and secure payment integration to support monetization and user engagement.

EDUCATION

Master of Computer Applications (MCA)

2019

Rajasthan University, Jaipur

Bachelor of Computer Applications (BCA)

2016

MGS University, Bikaner
