PROFESSIONAL SUMMARY

Flutter Developer with 4+ years of software development experience, including 3.5+ years building and maintaining production cross-platform Android and iOS apps with Flutter and Dart. Delivered 9 apps across 6 domains, including health and wellness, healthcare, live streaming, AI-driven social networking, logistics, and enterprise CRM. Strong in Provider, BLoC, GetX, Clean Architecture, and MVVM, with expertise in secure REST API integration, Firebase, performance optimization, and testing. Shipped 50+ releases to the Google Play Store and Apple App Store, taking apps from scratch to production and owning the full lifecycle through release. Hands-on backend experience with Node.js, Express.js, and MongoDB, plus CI/CD workflows using GitHub Actions and Fastlane.

TECHNICAL SKILLS

Languages: Dart, JavaScript, TypeScript, C, XML

Mobile Development: Flutter, Android, iOS, Cross-Platform Development, Responsive UI, Adaptive Layouts, Material Design, Custom Widgets, Animations, Platform Channels

State Management: Provider, BLoC, GetX

Architecture & Design Patterns: Clean Architecture, MVVM, Stacked, MVC, Repository Pattern, Dependency Injection, SOLID Principles, Object-Oriented Programming (OOP), Asynchronous Programming

Backend & APIs: Node.js, NestJS, Express.js, MongoDB, RESTful APIs, Secure API Integration, GraphQL, Dio, HTTP, JSON, JWT Authentication

Web (Additional): Angular, HTML, CSS

Firebase & Cloud Services: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Firebase Crashlytics, Cloud Storage, Push Notifications, Supabase, Parse Server

Local Storage: Hive, Shared Preferences, Offline Caching

Testing & Performance: Unit Testing, Widget Testing, Debugging, Performance Optimization

Third-Party Integrations: RevenueCat, Payment Gateway Integration, Third-Party Package Integration

Tools & Version Control: Git, GitHub, GitLab, Android Studio, Xcode, VS Code, Postman, JIRA, Trello, Figma

Development Practices & Deployment: Agile, Scrum, CI/CD (GitHub Actions, Fastlane, Firebase App Distribution), Code Reviews, Release Management, Google Play Store, Apple App Store Deployment

PROFESSIONAL EXPERIENCE

Flutter & Node.js Developer (Contract) — Geminate Solutions **June 2025 – June 2026**

Remote

- Independently delivered new Flutter features and enhancements — live-streaming improvements, post-stream reward claims with real-time balance updates, and refined user workflows — coordinating directly with the project manager for requirements and guidance.
- Engineered backend enhancements using Node.js, integrating the RevenueCat API for subscription management and in-app purchases, and Firebase services (Authentication, Cloud Firestore, Cloud Storage, Cloud Messaging) for secure authentication, data management, and push notifications.
- Stabilized and refined the application by resolving production issues, refactoring legacy modules, enhancing navigation flows, and managing application state with GetX.
- Estimated, developed, and tested production-ready features end-to-end, ensuring smooth releases and long-term application stability.

Flutter Developer — PiZone Infotech **February 2022 – June 2025**

Jaipur, India

- Delivered new features, enhancements, and bug fixes across 7 production Flutter applications, including authentication, AI-powered conversations, real-time messaging, subscriptions, payment integration, user profiles, and in-app coin systems.
- Designed and developed scalable cross-platform applications from the ground up using Flutter and Clean Architecture (Stacked, BLoC, Hive), implementing responsive UI, reusable components, and platform-specific optimizations for Android and iOS to improve maintainability, modularity, and offline data persistence.
- Implemented and optimized backend functionality using Node.js by integrating RESTful APIs, creating new endpoints, optimizing database queries, and implementing JWT-based authentication for secure access.
- Improved application performance and responsiveness by optimizing asynchronous operations and API integrations, speeding up screen loads across multiple apps, and diagnosing and fixing recurring production crashes to keep releases stable.
- Collaborated with cross-functional teams to estimate requirements and support successful releases; mentored junior developers, participated in code reviews, and wrote unit and widget tests to maintain code quality.

KEY PROJECTS

Zuzu Live (formerly Drago Live) — Real-Time Audio/Video Live-Streaming App

Skills Used: *Flutter, Dart, GetX, Clean Architecture, Node.js, Express.js, MongoDB, Firebase, Parse Server*

- Enhanced and maintained a cross-platform live-streaming app enabling real-time audio/video broadcasting, viewer interactions, and global social connections, backed by a Node.js, Express.js, and MongoDB backend.
- Rolled out RevenueCat-based subscription management and a post-stream reward claim system with real-time balance updates.

SimpleRuns — Freight & Delivery Tracking App

Skills Used: *Flutter, Dart, Provider, Clean Architecture, Node.js, Express.js, MongoDB*

- Developed a delivery tracking and load sheet management application for freight operations, integrating RESTful APIs and enforcing token-based access control to safeguard user data.
- Optimized database queries and backend endpoints to improve data reliability and performance; published on Google Play Store and Apple App Store.

VISTA — Workplace Wellbeing Platform

Skills Used: *Flutter, Dart, BLoC, Clean Architecture, Hive, Firebase*

- Delivered a workplace wellness platform providing real-time, behavior-based insights to help remote teams improve engagement and mental, physical, and social wellbeing.
- Architected the app using Clean Architecture and BLoC for scalable state management, with Hive for efficient local data persistence.

LinkUp Idea — AI-Powered Social Collaboration App

Skills Used: *Flutter, Dart, Stacked, Firebase, Stripe*

- Created a cross-platform app connecting users worldwide based on shared ideas and goals, combining AI-powered conversations with real-time messaging for collaboration.
- Added subscription plans, an in-app coin system, and secure payment integration to support monetization and user engagement.

EDUCATION

Master of Computer Applications (MCA) **2019**

Rajasthan University, Jaipur

Bachelor of Computer Applications (BCA) **2016**

MGS University, Bikaner
